

A presentation by University of California, San Diego, Professor of History and Science Studies

NAOMI ORESKES

on her book...

Wednesday, October 20
6:30 PM

Beach/Schmidt
Performing Arts Center

No Charge for Admission

“A well-documented, pulls-no-punches account of how science works and how political motives can hijack the process by which scientific information is disseminated to the public.”

– *Kirkus Reviews*

Professor of History and Science Studies at the University of California, San Diego, and Adjunct Professor of Geoscience at the Scripps Institution of Oceanography, Dr. Naomi Oreskes' research focuses on consensus and dissent in science.

Her 2004 essay “The Scientific Consensus on Climate Change,” cited by Al Gore in An Inconvenient Truth, led to Op-Ed pieces in the Washington Post, the Los Angeles Times, and the San Francisco Chronicle, and to Congressional testimony in the U.S. Senate Committee on Environment and Public Works.
